5

platforms built 0 → 1

4

AI systems shipped

Senior AI Engineer shipping LLM products since the early days of the OpenAI API: agentic systems, Retrieval-Augmented Generation (RAG), fine-tuning, prompt engineering and Model Context Protocol (MCP). Shipped four AI systems to production, including a voice repair assistant, agentic sales analytics and MCP automations. Six years of production Python, DRF, ClickHouse, PostgreSQL and AWS; five platforms built from zero to one.

Experience

Senior AI Engineer

Sep 2025 — Present

The Branding Club (BrandHub) · Full-time

- Build AI automations and the platform MCP server so agents can work with business data.
- Orchestrate data pipelines in Azure Data Factory, landing data in Azure Blob Storage.
- Integrate HubSpot, Exact and Mollie through APIs built with Django REST Framework.
- Deliver Metabase BI dashboards for sales and operations teams.

Python Developer

Jan 2024 — Sep 2025

Nuvama Wealth · Full-time

- Built Alpha AI, an agentic sales assistant on OpenAI and Ollama with tool calling and RAG.
- Made search across 10M user records 20x faster, down to ~20ms per query.
- Launched a Superset sales-reporting platform with user hierarchies, replacing Tableau.
- Built APIGen (SQL-to-API platform) and Mutual Funds journey APIs; automated data validation.

Full Stack Developer

Apr 2022 — Jan 2024

Unbox Innovations · Full-time

- Built a voice call assistant for Fixtops on OpenAI and LiveKit, using tool calling to book repairs.
- Designed and built RESTful APIs in Python and Django for client web and mobile products.
- Ran background jobs with Celery, crons and Redis, with file storage on Amazon S3.
- Handled basic deployments on AWS and GCP, and tested and debugged features end to end.

Analyst

Nov 2020 — Apr 2022

eClerx · Full-time

- Analysed large volumes of data to identify trends, patterns and outliers.
- Built Python web-scraping scripts to collect and structure client data in PostgreSQL.
- Prepared analysis and reporting in MS Excel for client operations teams.
- Cleaned and validated datasets before they reached downstream reports.

Skills

AI & LLMs

- Agentic AI
- Multi-agent systems
- RAG
- Fine-tuning
- Prompt engineering
- Function calling
- MCP
- Vector databases
- Embeddings
- LangChain
- LangGraph
- LlamaIndex
- OpenAI
- Claude
- Ollama

Languages & frameworks

- Python
- DRF (Django REST)
- FastAPI
- Streamlit
- pandas
- NumPy
- Next.js
- Jupyter

Data & BI

- PostgreSQL
- ClickHouse
- Redis
- Apache Superset
- Metabase
- Tableau
- MS Excel
- MSSQL

Cloud & DevOps

- AWS
- Amazon S3
- GCP
- Azure Data Factory
- Docker
- Linux
- Celery
- CI/CD

Projects

Peirce.app

2025 — Present

AI-native workspace for software teams · Founder · side project · peirce.app

Scrum, chat and calls, docs, whiteboards, ERDs, API collections and designs in one multi-tenant workspace, exposed to AI agents as one permission-aware context layer so they can plan and ship work.

- MCP server: users connect their own Claude or Codex by token; each tool call is checked against their roles.
- Agents create and edit work items, docs, ERDs, API specs and designs by name; changes stream live to the team.

Rust Elixir Next.js PostgreSQL Redis RabbitMQ Docker Jira GitHub MCP

Alpha AI

AI-driven analytics platform · Nuvama Wealth

Agentic sales-analytics assistant that uses tool calling to write and run schema-aware SQL on live data.

- RAG over table schemas and embeddings on Ollama
- Reasons over results and renders charts in Streamlit

Python Streamlit Ollama RAG

Fixtops

AI repair-assistance platform · Unbox Innovations

Repair help for electronics, vehicles and home appliances, from an AI call assistant to doorstep pickup.

- Voice agent on OpenAI + LiveKit with tool calling
- Partner app for home assessment, pickup and return

Python OpenAI LiveKit DRF

APIGen

SQL-to-API generator · Nuvama Wealth

UI-driven platform for building APIs from SQL queries over PostgreSQL, ClickHouse and MSSQL.

- Filtering, pagination and sorting out of the box

Python DRF PostgreSQL ClickHouse

Sales BI Platform

Customised Apache Superset · Nuvama Wealth

Replaced proprietary BI with open-source Superset, customised in UI and function for sales operations.

- Embedded analytics with scheduled report subscriptions

Apache Superset Python ClickHouse

Education

Bachelor of Engineering
University of Mumbai

2015 — 2019

Certifications

Introduction to Artificial Intelligence
Data Science with Python
 Simplilearn

Jul 2019
Mar 2020
